

# What each pillar contributes

Paired scenes: rank-2 baseline and one variant per scene

**Slate: base dice    Teal: applied tag dice    Orange dash: rank trend    Whiskers: 95% family intervals**

1991 valid actions / 2000 saved attempts / 2000 planned; 8 mechanical rejections, 1 missing or transport failures.

Rank means use different scene subsets; whiskers use 95% t intervals across families ( $n < 3$ : full-width bounds).

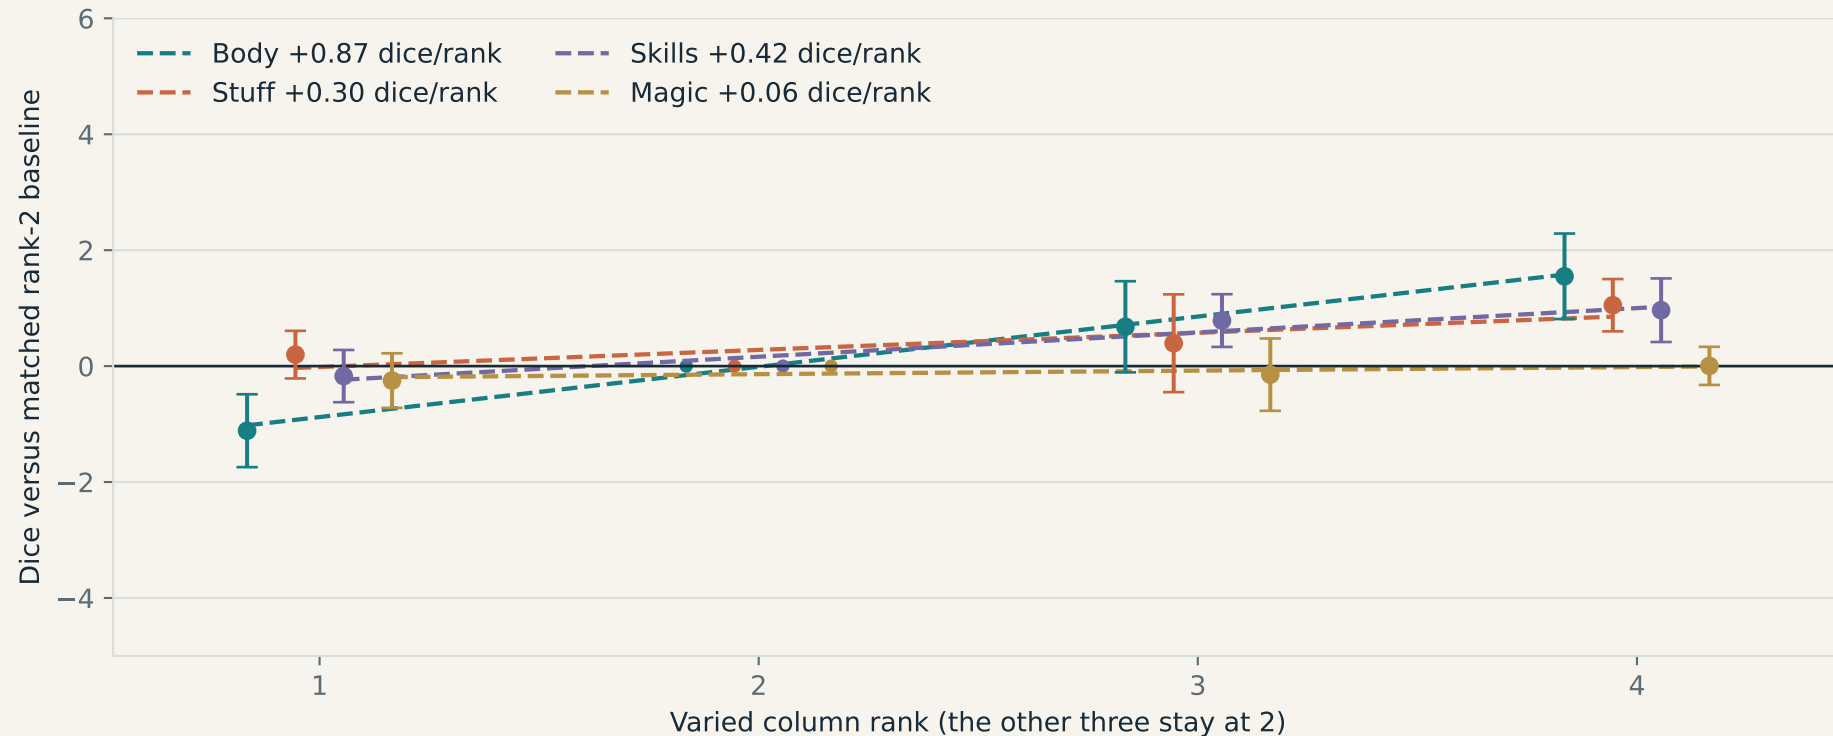

Rank-2 baseline is shared. Fewest valid: Body-1 (81/83); rejected responses can bias slopes.

# Turn just one dial

Pool change from the same family's all-rank-2 baseline

Only family-scene pairs with both actions mechanically valid appear here.

The model chooses its own objective and action for each character, even in the same scene.

Each comparison has 80-84 matched scenes; 95% intervals use independent family means (n=6).

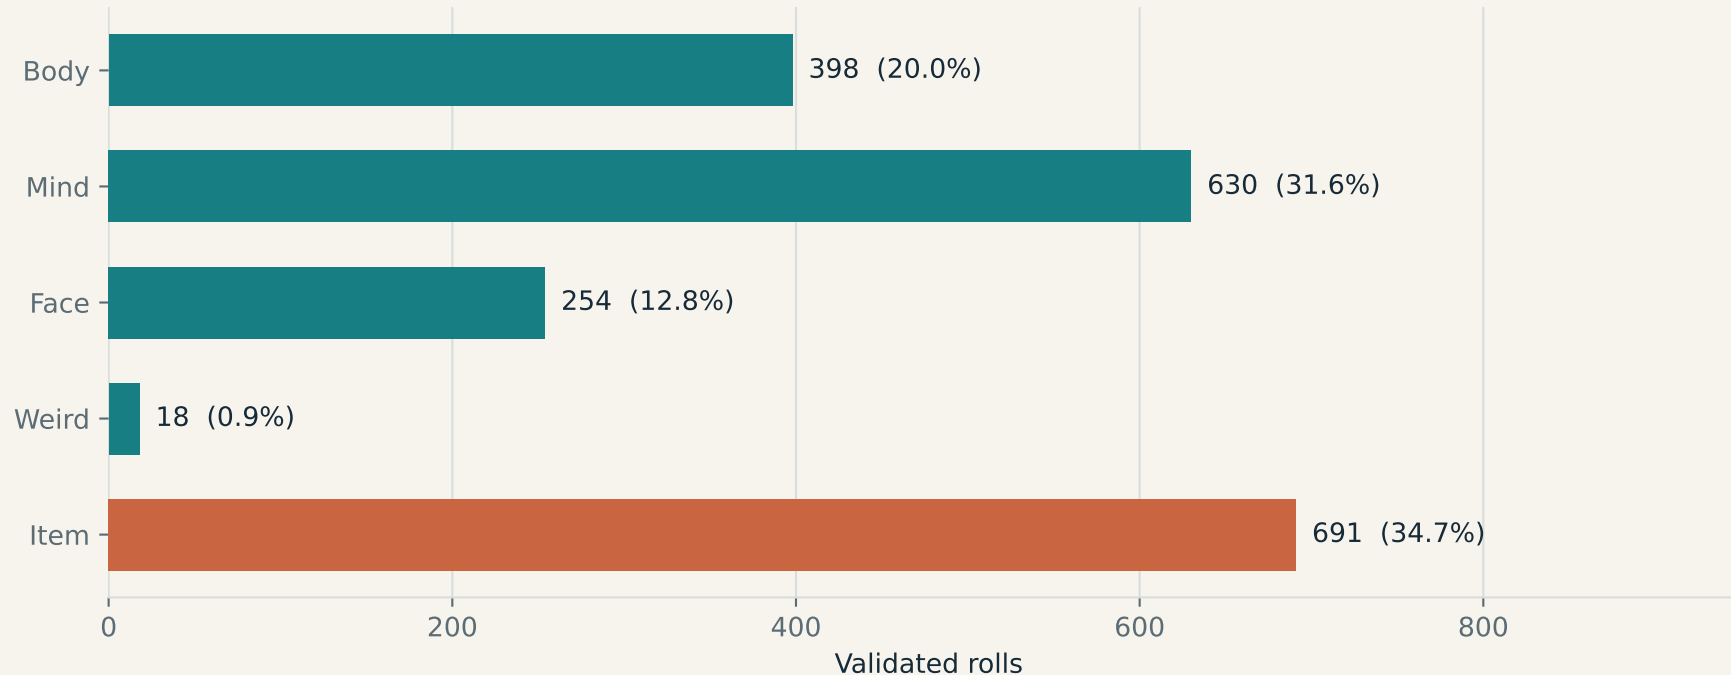

Dashed lines fit rank-level matched differences (including the zero baseline).

Body and Skills can also change the Body/Mind/Face stat budget. Stuff can supply the base through an item, including its rank-4 Tier-5 capstone. Magic changes tags and Weird. Those are the intended mechanisms of each dial, not separately randomized attributes.

This design breaks the normal A/B/C/D priority constraint on purpose; results describe this test, not legal starting builds.

# Which base was chosen?

One listed base per mechanically valid roll

## ITEM BASES BY SCENE THEME (NOT A REQUIRED STAT)

### Body

193 / 497 (38.8%)

### Mind

167 / 497 (33.6%)

### Face

160 / 497 (32.2%)

### Weird

171 / 500 (34.2%)

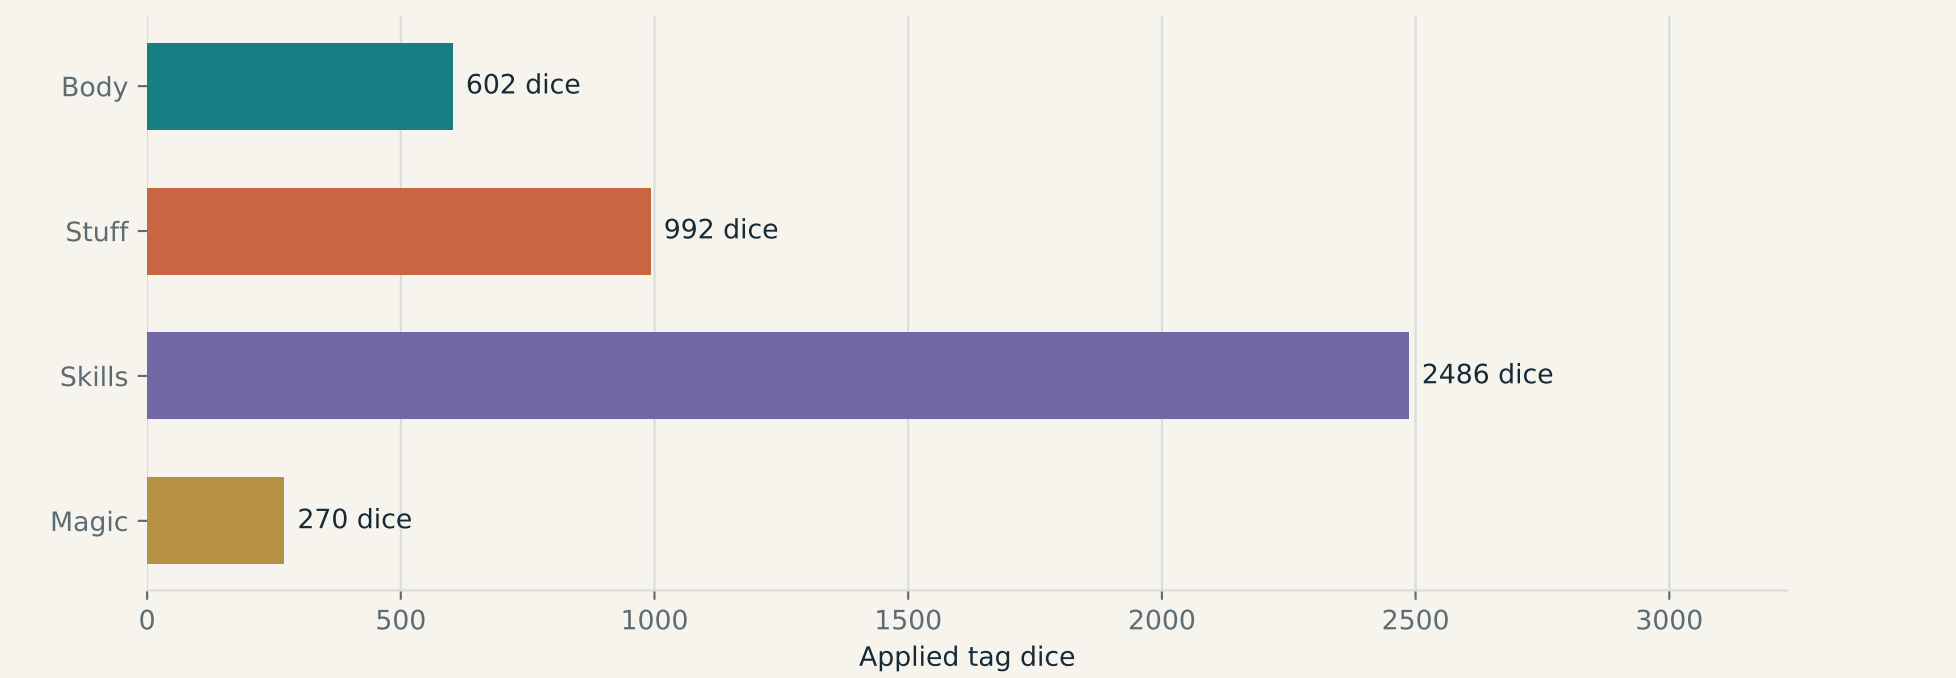

Base denominator: 1991 mechanically valid rolls out of 2000 planned.

Item means an owned gear ID was chosen; its printed tier supplied the base dice.

8 rejected; 1 transport errors; 0 unsent/missing. These are excluded from base frequencies.

# Where tag dice came from

Applied tags after the five-tag cap, across all four domains

| ACTIONS USING AT LEAST ONE TAG FROM EACH DOMAIN |                    |                     |                    |
|-------------------------------------------------|--------------------|---------------------|--------------------|
| Body                                            | Stuff              | Skills              | Magic              |
| 591 / 1991 (29.7%)                              | 819 / 1991 (41.1%) | 1771 / 1991 (89.0%) | 217 / 1991 (10.9%) |

4350 applied tag dice across 1991 validated rolls; 0 valid responses hit the five-tag cap.

An action can use multiple domains and multiple tags per domain; action percentages need not sum to 100%.

Recorded model cost: \$0.637 across 1999 billed responses. Unknown billing for 1 transport errors.

AI judges fictional applicability. Rejections and missing calls can bias frequencies; each scene is tested with one baseline/variant pair.

# What's on each sheet

Owned tags and all available base ratings, by varied pillar rank

## Body rank

| Rank | Tags | Mean base | Options |
|------|------|-----------|---------|
| 1    | 12   | 1.83      | 6.0     |
| 2    | 13   | 2.14      | 6.0     |
| 3    | 14   | 2.41      | 6.0     |
| 4    | 16   | 2.78      | 6.0     |

## Stuff rank

| Rank | Tags | Mean base | Options |
|------|------|-----------|---------|
| 1    | 11   | 2.21      | 4.0     |
| 2    | 13   | 2.14      | 6.0     |
| 3    | 15   | 2.29      | 6.8     |
| 4    | 18   | 2.79      | 7.7     |

## Skills rank

| Rank | Tags | Mean base | Options |
|------|------|-----------|---------|
| 1    | 10   | 2.00      | 6.0     |
| 2    | 13   | 2.14      | 6.0     |
| 3    | 16   | 2.28      | 6.0     |
| 4    | 20   | 2.53      | 6.0     |

## Magic rank

| Rank | Tags | Mean base | Options |
|------|------|-----------|---------|
| 1    | 10   | 2.36      | 5.0     |
| 2    | 13   | 2.14      | 6.0     |
| 3    | 17   | 2.30      | 6.0     |
| 4    | 22   | 2.47      | 6.0     |

Each variation has 500 offline-generated sheets, separate from the 6 AI-tested families.

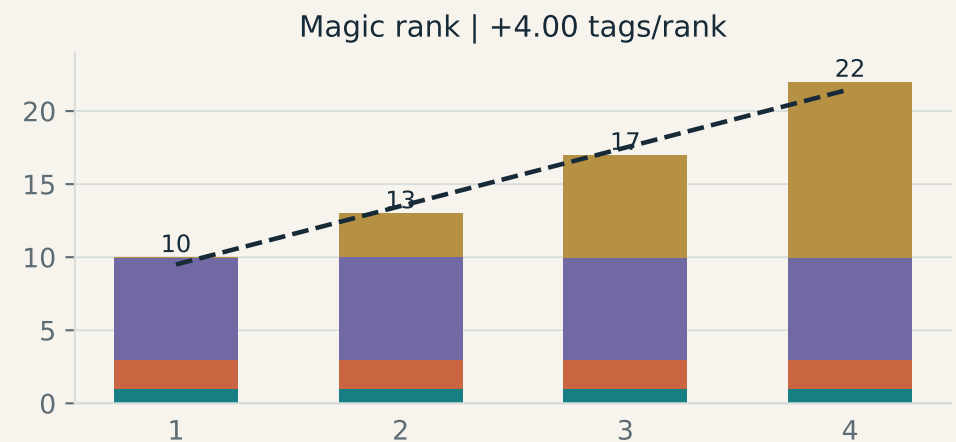

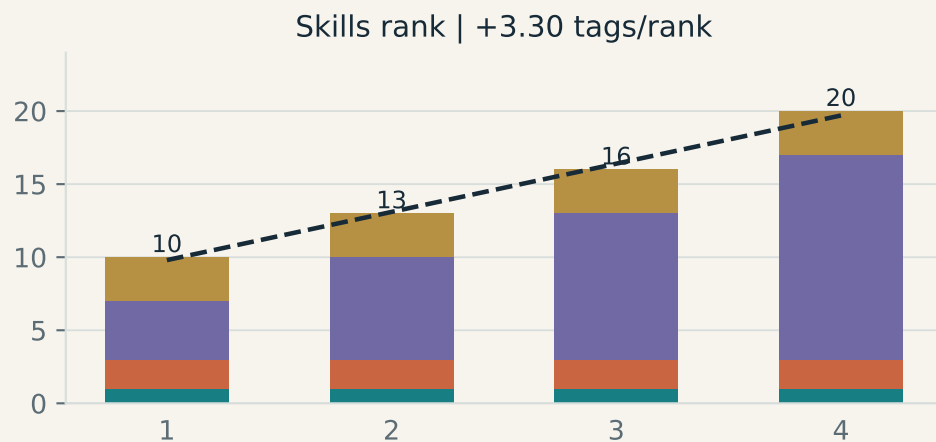

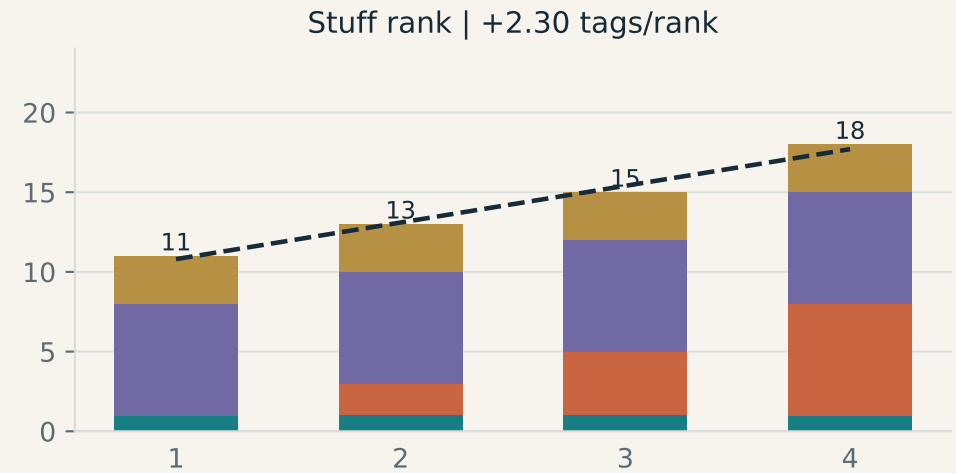

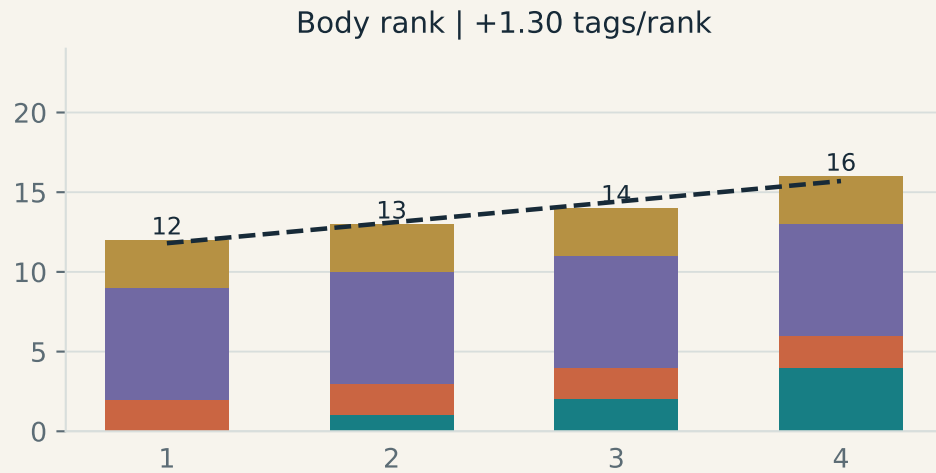

Tags = mean total owned per sheet; Options = mean count of available bases per sheet.

Mean base pools every Body, Mind, Face, nonzero Weird and owned item tier across those sheets.

Item tiers are standalone base options; no AI choices or rejected actions enter these tables.

# Who owns the tags?

Mean tags on each character sheet, stacked by domain

Body

Stuff

Skills

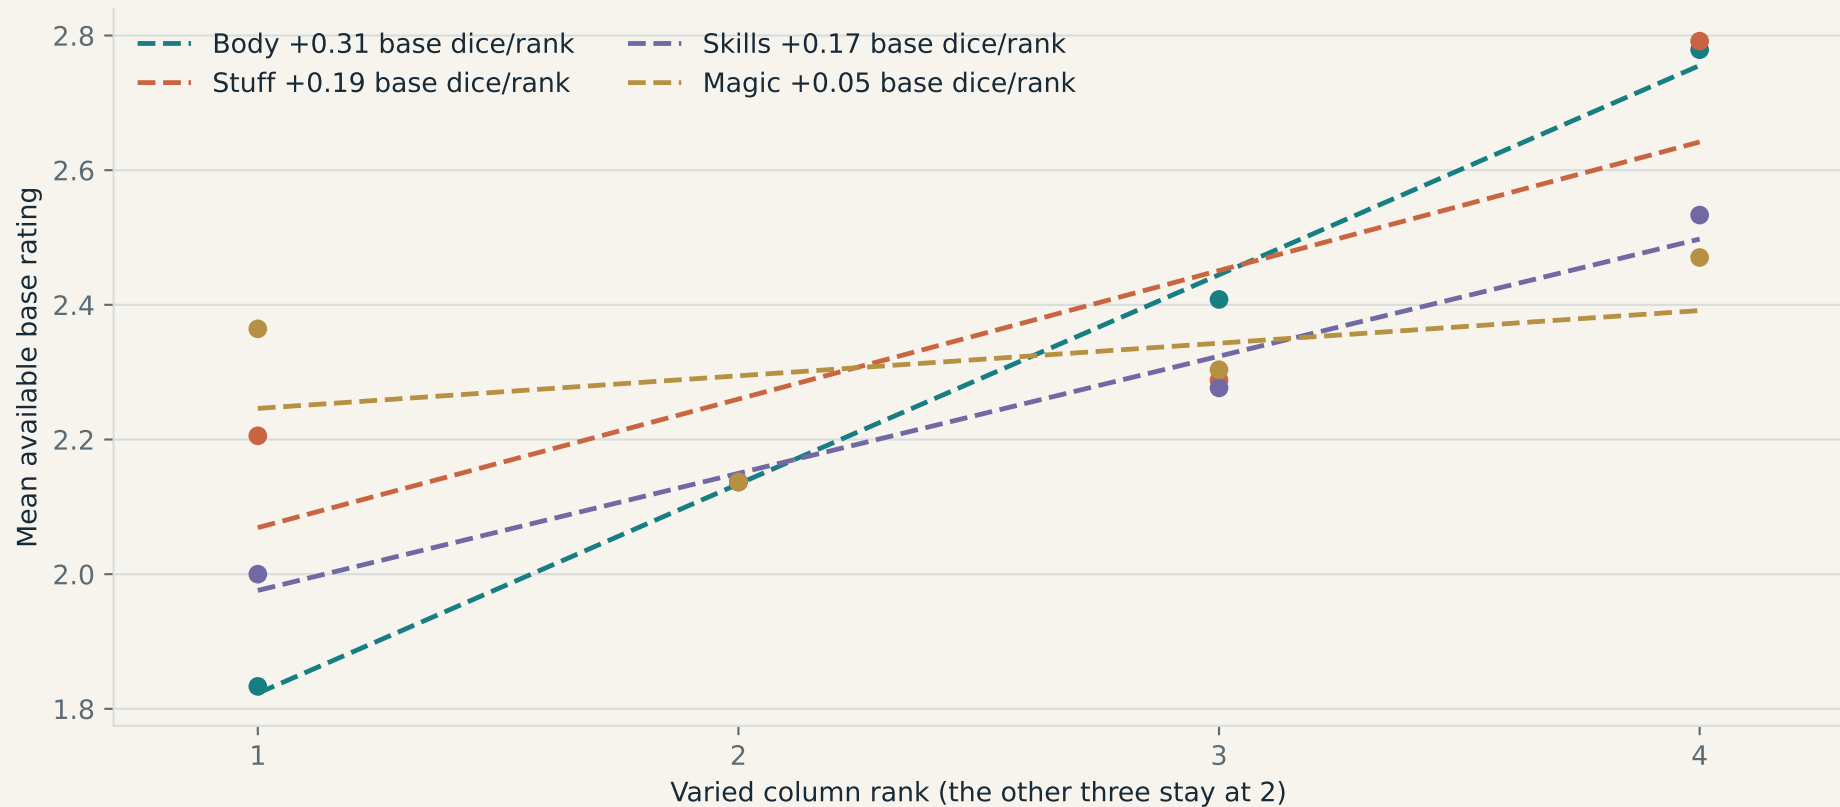

Magic

Numbers above bars: owned tags per sheet; black dashed lines: fitted rank trends, not tags selected for actions.

All bars average 500 offline families; each panel shares the same all-rank-2 baseline.

# What bases are available?

Mean of all printed base ratings on offline character sheets

Each point pools Body, Mind, Face, nonzero Weird, and every item tier across 500 offline family sheets.

Dashed lines are linear fits to four rank means. Their slopes summarize this generated inventory, not an AI choice or a causal effect.

No scene, action, tag selection, or mechanical rejection enters these base-rating averages.

# Meet the Travellers

Random sample from the characters sent to the model

Body 3 / Stuff 2 / Skills 2 / Magic 2

Character 16

PICK ONE BASE STAT OPTION:

- Body: 3
- Mind: 4
- Face: 3
- Weird: 1
- gear-1 / Pistol: 2 (Weapon)
- gear-2 / Impact-Weave Bodysuit: 2 (Armour)

PICK UP TO FIVE OF THESE TAGS THAT CLEARLY APPLY TO THE SAME ACTION:

- Body (Rank 3):
  - body:Camouflage
  - body:Natural Weapon
- Stuff (Rank 2):
  - stuff:gear-1:Explosive (Pistol)
  - stuff:gear-1:Silent (Pistol)
- Skills (Rank 2):
  - skill:Perception
  - skill:Lore
  - skill:Archery
  - skill:Stealth
  - skill:Brawling
  - skill:Hacking
  - skill:Athletics
- Magic (Rank 2):
  - magic:Magic
  - magic:Air
  - magic:Animal

Body 3 / Stuff 2 / Skills 2 / Magic 2

Character 42

PICK ONE BASE STAT OPTION:

- Body: 2
- Mind: 2
- Face: 5
- Weird: 1
- gear-1 / Sidearm: 2 (Weapon)
- gear-2 / Lockpick Rig: 2 (Gadget; picks and probes that open locks)

PICK UP TO FIVE OF THESE TAGS THAT CLEARLY APPLY TO THE SAME ACTION:

- Body (Rank 3):
  - body:Strong
  - body:Intimidating
- Stuff (Rank 2):
  - stuff:gear-2:Adaptive (Lockpick Rig)
  - stuff:gear-1:Disarming (Sidearm)
- Skills (Rank 2):
  - skill:Athletics
  - skill:Survival
  - skill:Persuasion
  - skill:Hacking
  - skill:Archery
  - skill:Brawling
  - skill:Blades
- Magic (Rank 2):
  - magic:Destroy
  - magic:Magic
  - magic:Earth

Random selection is reproducible from the run seed. Feats are not shown to the model.

# What happened?

Random sample of the shared scenario texts, not prescribed actions

---

## scene-111 / Face theme / target 1

At a depot, a keeper refuses a healer's request for emergency supplies while a delivery cart waits outside. A signed allocation order is on the counter, unopened. A decision is due sooner than expected. A messenger can carry a private reply. A loose blue thread catches on your sleeve.

## scene-749 / Body theme / target 1

A jammed lift hangs halfway up a tower with workers inside. Its counterweight is visible through a grate, and a stairwell reaches the next landing. A heavy load shifts without warning. A fixed railing provides a handhold. A strand of hair brushes your cheek.

## scene-267 / Face theme / target 2

At a depot, a keeper refuses a healer's request for emergency supplies while a delivery cart waits outside. A signed allocation order is on the counter, unopened. A rumour about the dispute spreads through the room. A supporter volunteers to speak first. A feather drifts down nearby.

## scene-539 / Face theme / target 1

Two armed crews argue over a bridge, trapping a merchant's caravan between them. Their leaders are within earshot, while an old footpath skirts the dispute. Someone threatens to leave the discussion. A neutral observer offers to hear both sides. A tiny beetle crawls across a nearby surface.

## scene-533 / Body theme / target 3

At a crowded river crossing, a mercenary blocks the bridge while a merchant's cart waits in line. A half-empty ferry is tied to the downstream bank. The available space grows tighter. A length of rope can be borrowed. A button on your coat catches the light.

## scene-939 / Face theme / target 3

A watch captain argues with a trader at the city gate while the queue grows restless. A clerk holds the permit ledger, and a side entrance stands unattended. A public argument draws more attention. Someone nearby knows a person both sides trust. Someone nearby hums a familiar tune.

## scene-511 / Face theme / target 4

At a camp council, two scouts disagree about where to shelter from a storm. A porter has seen both sites, and the cooks have already begun packing. A witness grows reluctant to speak. A messenger can carry a private reply. A small moth circles in the light.

## scene-50 / Mind theme / target 2

In the archives, the iron vault has been sabotaged and repair records are out of order. A guard has a list of visitors, while a dropped badge lies under the desk. The evidence is being moved out of sight. A damaged component can still be examined. A tiny beetle crawls across a nearby surface.

Themes stratify the sample; the model sees only scene text and target.

# How the rolls were built

Random validated model actions: original plan, selected base and tag dice

---

## character-53 / scene-121

Action: I'll use my Hoverboard to quickly navigate through the smoke and debris, aiming to clear a path for the workers to escape through the loading bay.

**Base: Hoverboard (gear-1) = 2 dice**

Stuff: Armoured (+1)

Stuff: Spacious (+1)

**2 base + 2 tag(s) = 4 dice**

## character-13 / scene-988

Action: I will attempt to discern the meaning of the scratched symbol on the mirror, focusing on the irregular rhythm of the reflection.

**Base: Mind = 4 dice**

Magic: Reading (+1)

Skills: Hacking (+1)

**4 base + 2 tag(s) = 6 dice**

## character-4 / scene-898

Action: Investigate the maintenance log for clues about the altered record.

**Base: Mind = 5 dice**

Body: Keen Senses (+1)

Skills: Hacking (+1)

Skills: Deception (+1)

**5 base + 3 tag(s) = 8 dice**

## character-40 / scene-406

Action: I will attempt to hack into the watchtower's system to understand why the warning lights are flashing and if there's a real threat.

**Base: Mind = 4 dice**

Skills: Hacking (+1)

**4 base + 1 tag(s) = 5 dice**

Shown after mechanical validation and the five-tag cap; applicability needs GM review.
